**Fel d 1 ELISA kit (6F9/3E4)**

**Product Code: EL-FD1**

**Lot Number: xxxxx**

**Sample Curve:**

![Sample Curve Graph](image)

**Content:**

- **Vial 1** (red top) 100 μL
  - Monoclonal antibody 6F9
  - Concentration: 1mg/ml in PBS

- **Vial 2** (white top) 400 μL
  - Universal Allergen Standard
  - Concentration: 1000ng/ml Fel d 1

- **Vial 3** (brown) 100 μL
  - Biotinylated Monoclonal antibody 3E4
  - Dilute: 1:1000 for use

**Storage:** The ELISA kit should be stored at 4°C

**For research and commercial use in vitro: not for human in vivo or therapeutic use.**
Certificate of Analysis

Monoclonal Antibody: 6F9 (clone 6F9 A4 H1)
Immunogen: Fel d 1
Isotype: Mouse IgG1
Specificity: Binds to an epitope on cat Felis domesticus allergen, Fel d 1, Chain 1.
Purification: Produced in tissue culture and purified by affinity chromatography using recombinant Protein G. Single heavy and light chain bands on SDS-PAGE. Concentration: 1.0mg/ml in phosphate buffered saline, pH 7.4. Based on A280 for IgG (1.42=1mg/ml) 0.22μm filtered, preservative free.

Lot Number: xxxxx

Monoclonal Antibody: 3E4 (clone 3E4 C4 C10)
Immunogen: Fel d 1
Isotype: Mouse IgG1
Specificity: Binds to an epitope on cat Felis domesticus allergen, Fel d 1, Chain 1.
Purification: Produced in ascites and purified by ammonium sulphate precipitation and HPLC using recombinant Protein G. Single heavy and light chain bands on SDS-PAGE. Biotinylation: Biotinylated and titrated for use in ELISA at 1/1000 dilution. Prepared in 1% BSA/50% glycerol/PBS, pH 7.4, 0.22μm filtered, preservative free.

Lot Number: xxxxx

Allergen Standard: Universal Allergen Standard
Composition: A formulation of eight purified natural allergens prepared in 1% BSA/50% glycerol PBS, pH 7.4.

Lot Number: xxxxx

Concentration: [Table]

ELISA Protocol for Fel d 1.

1. Coat polystyrene microtiter plates (NUNC Maxisorp Cert. NUNC catalog # 439454) with 100μl mAb 6F9 at 10μl/10ml, i.e. 1/1000 dilution of stock, in 50mM carbonate-bicarbonate buffer, pH 9.6, incubate overnight at 4°C.

2. Wash wells 3x with PBS-0.05% Tween 20, pH 7.4 (PBS-T). Incubate for 30 min. at room temperature with 100μl/well of 1% BSA, PBS-T. Wash 3x with PBS-T.

3. Use doubling dilutions of the Universal Allergen Standard to make a control curve ranging from 100 - 0.2ng/ml Fel d 1: Pipette 20μl UAS into 180μl 1% BSA, PBS-T into wells A1 and B1 on the ELISA plate. Mix well and transfer 100μl across the plate into 100μl 1% BSA, PBS-T diluent to make 10 serial doubling dilutions. Wells A11, B11 and A12, B12 should contain only 1% BSA, PBS-T as blanks.

4. Add 100μl of diluted allergen samples and incubate for 1 hour at room temperature. House dust extracts for Fel d 1 analysis are routinely diluted two-fold from 1/10-1/80. Other sample types, like air filter extracts and allergen extracts, may require different dilutions.

5. Wash wells 3x with PBS-T and add 100μl diluted biotinylated anti-Fel d 1 mAb 3E4. The antibody solution contains 50% glycerol and should be diluted 1/1000 in 1%BSA, PBS-T. Incubate for 1 hour at room temperature.

6. Wash wells 3x with PBS-T and add 100μl diluted Streptavidin-Peroxidase (Sigma S5512, 0.25mg reconstituted in 1ml distilled water). The reconstituted Streptavidin should be diluted 1/1000 in 1%BSA, PBS-T. Incubate for 30 minutes at room temperature.

7. Wash wells 3x and develop the assays by adding 100μl 1mM ABTS in 70mM citrate phosphate buffer, pH 4.2 and 1/1000 dilution of H2O2. Read the plate when the absorbance at 405nm reaches 2.0-2.4.

Notes:

Universal Allergen Standard is recommended for immunoassay calibration purposes only. Not recommended for in-vitro antibody measurements, T cell studies, immunization purposes, or other uses.
